NOTICE OF PRELIMINARY PERMIT APPLICATION ACCEPTED FOR FILING
AND SOLICITING COMMENTS, MOTIONS TO INTERVENE, AND COMPETING
APPLICATIONS

On December 10, 2012, West Street Hydro, Inc., filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Ashuelot River Dam Hydroelectric Project (project) to be located on the Ashuelot River, near the City of Keene, Cheshire County, New Hampshire. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) the existing 160-foot-long, 16-foot-high, stone-masonry Ashuelot Park Dam with a 134-foot-long spillway; (2) an existing 34-acre impoundment with a normal maximum water surface elevation of 472 feet above mean sea level; (3) a new intake structure; (4) a new powerhouse containing two 43-kilowatt (kW) turbine-generating units for a total installed capacity of 86 kW; (5) a new tailrace; (6) a new 330-foot-long, 34.5-kilovolt transmission line; and (7) appurtenant facilities. The estimated annual generation of the project would be 360 megawatt-hours.
